Box	No. I	Basis of the report
1.	otherw	gard to the language, this report is based on the international application in the language in which it was filed, unless se indicated under this item. This report is based on a translation from the original language into the following language which is the language of a translation furnished for the purposes of: international search (under Rules 12.3 and 23.1(b)) publication of the international application (under Rule 12.4) international preliminary examination (under Rules 55.2 and/or 55.3)
2.	furnish	egard to the elements of the international application, this report is based on (replacement sheets which have been ed to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" not annexed to this report): the international application as originally filed/furnished the description: pages 1-13 as originally filed/furnished pages* received by this Authority on pages* received by this Authority on
		the claims: pages 14
3.		a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing. The amendments have resulted in the cancellation of: the description, pages the claims, Nos. the drawings, sheets/figs any table(s) related to the sequence listing (specify):
4.		This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)). the description, pages the claims, Nos. the drawings, sheets/figs the sequence listing (specify): any table(s) related to the sequence listing (specify):
*	If item	4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. II	Priority							
1. This report has been established as if no priority had been claimed due to the failure to furnish within the prescribed time limit the requested:								
	copy of the earlier application whose priority has been claimed (Rule 66.7(a)).							
	translation of the earlier application whose priority has been claimed (Rule 66.7(b)).							
2. This report has been established as if no priority had been claimed due to the fact that the priority claim has been found invalid (Rule 64.1). Thus for the purposes of this report, the international filing date indicated above is considered to be the relevant date.								
3. Addition	al observation	ns, if necessary:						
		considered relevance.	valid.	Therefore,	document	EP 1	341 391

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

Box No. IV Lack of unity of invention
1. In response to the invitation to restrict or pay additional fees the applicant has:
restricted the claims.
paid additional fees.
paid additional fees under protest.
neither restricted nor paid additional fees.
2. This Authority found that the requirement of unity of invention is not complied with and chose, according to Rule 68.1, no to invite the applicant to restrict or pay additional fees.
3. This Authority considers that the requirement of unity of invention in accordance with Rules 13.1, 13.2 and 13.3 is:
complied with.
not complied with for the following reasons:
The independent claims 1, 9 and 13 lack novelty.
The following separate inventions were identified:
I: Claims 2, 4-7, 10, 12 and 14 directed to a method, a system and a server where a message having one structure for messages is converted to have a structure according to bearer independent protocol and/or vice versa.
I: Claims 3, 8 and 11 directed to a method and a system for using bearer independent protocol when transmitting a message from a sender to a receiver.
4. Consequently, this report has been established in respect of the following parts of the international application:
all parts.
the parts relating to claims Nos.

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability citations and explanations supporting such statement				
Statement Nove		Claims	2-5,7,8,10-12,14,15	YES NO

2. Citations and explanations (Rule 70.7)

The claimed invention

The present invention aims to solve the problem of transmitting a message having a first structure for messages to a receiver to a second system having a second structure for the messages. By utilising a bearer independent protocol, the transmission can be achieved.

Reference is made to the following documents:

D1: WO0215603 A2 D2: WO0056091 A1

D3: WAP WDP Version 05-Nov-1999: "Wireless Application Protocol; Wireless Datagram Protocol Specification". WIRELESS APPLICATION PROTOCOL FORUM LTD, November 1999.

D4: EP0854655 A2

D1 describes a method for sending a short message between a sender and receiver independent of operator, location, and network protocols in a mobile communication system, (abstract, claim 21). A user of a terminal may use a WAP (wireless application protocol) phone using the WWW to connect and send a message through the server to a mobile network operator to an end user on the SMS phone or other type of cellular device, (page 7 lines 7-10).

D1 solves the above defined problem, which the present invention aims to solve.

. . . / . . .

Supplemental Box

In case the space in any of the preceding boxes is not sufficient. Continuation of: Box $\,V\,$

D2 discloses a method and apparatus for interconnecting a first network using a first SMS message protocol and a second network using a second SMS message protocol to enable SMS message transmissions between the first and second networks (abstract).

D3 and D4 are considered to merely disclose the state of the art and are not commented on further.

Reasoned statement

Thus, D1 describes a method and apparatuses for transmitting a messaging service message from a sender in a first system, (e.g. GSM) having a first structure for messages, to a receiver of a second system (e.g. CDMA) having a second structure for the messages (e.g. CDMA), (page 2, lines 1-10) by utilising a bearer independent protocol in the transmission of the message, (page 7 lines 8-9).

The subject-matter of claims 1, 6, 9 and 13 does not differ from D1. Therefore, claims 1, 6, 9 and 13 lack novelty.
